### My Spotify Dashboard

Jan. 2020 - Jan. 2020

- MSD is a Full-Stack React application that leverages Spotify's API to display information about the user's listening habits.
- The user can find recently played tracks, top tracks, and top artists.
- The backend is using NodeJS and the frontend is using OAuth for authentication.
- This project is still in development and I'll be adding new features over time.

### Key Conservation

Aug. 2019 - Sept. 2019

- Key Conservation is a non-profit organization that's helping conservationists receive funding and support by posting campaigns on the app
- A team of six developers and two UI designers built an enterprise level mobile application over eight weeks in React Native
- NodeJS and Express for the back-end, PostgreSQL for the database Auth0 for authentication and React on the front-end.
- Assisted building the front-end and back-end, and in deployment

### In-Reach

Oct. 2019 - Nov. 2019

- A contact app where a user is able to add, edit, delete and search contacts which are categorized as personal or professional.
- Full Stack MERN application using MongoDB, Express, NodeJS for back-end and React on front-end
- Authentication is handled using JSON Web Tokens(JWT) and error handling is included
- This project was a personal intro/playground to using React Hooks
